

OUR SERVICE

02 LEAN & DIGITAL TRANSFORMATION INTEGRATION CONSULTANCY

In the era of Industry 4.0, manufacturing companies face increasing pressure to improve productivity, control costs, and respond quickly to market changes. However, many digital transformation initiatives fail to deliver expected results because technology is implemented without an optimized operational foundation. At WISE Academy, we help organizations integrate Lean Management with Digital Transformation to ensure that technology investments generate real operational and business value.

Lean focuses on eliminating waste and optimizing processes, while digital technologies enable automation, real-time data visibility, and data-driven decision making. When combined effectively, these approaches help organizations build efficient, transparent, and agile operations.

Through this integration, companies can:

- Improve productivity and operational efficiency
- Gain real-time visibility of production data
- Reduce operational costs and process errors
- Strengthen data-driven decision making
- Build flexible and scalable production systems

WISE Academy works closely with manufacturing organizations to design and implement practical Lean-Digital solutions aligned with their production environment, ensuring transformation initiatives deliver measurable and sustainable results.

Key Consultancy Services

Operational Real-time Data Management Systems

Developing digital solutions that enable real-time monitoring and analysis of production data to support faster and more accurate decision making.

Industrial System Engineering

Designing and optimizing production systems to improve workflow efficiency, productivity, and operational stability.

Total Productive Maintenance (TPM)

Implementing structured maintenance systems to improve equipment reliability and minimize downtime.

Total Quality Management (TQM)

Establishing comprehensive quality management systems to ensure process control, product consistency, and continuous improvement.

FIGURE 5

Digital lean business opportunity and value

POTENTIAL BENEFITS			
 Improved asset efficiency 10–20%	 Improved quality 10–35%	 Reduced costs 20–30%	 Improved safety and sustainability 3–10%
▲ Optimized capacity ▲ Asset utilization ▼ Changeover time ▼ Downtime ▲ Overall equipment effectiveness	▼ Scrap rates ▲ Fill rate ▲ Yield ▼ Lead times	▼ Labor cost ▼ Sourcing cost ▼ Inventory levels ▼ Maintenance cost ▼ Warranty cost	▼ Safety incidents ▲ Employee satisfaction ▲ Sustainable practices ▼ Environmental impact
