ABOUT THE PROGRAM

Manufacturing companies are facing increasing pressure on productivity, cost, quality, and delivery performance. Many production lines still suffer from waste, bottlenecks, unbalanced workloads, and inefficient work methods. This program helps participants develop both the mindset and practical techniques needed to improve line productivity systematically and sustainably.

LEARNING METHODOLOGY

- Interactive lectures
- Simulation games & workshops
- Group discussions
- Case studies
- GEMBA/shopfloor practice
- Hands-on exercises with real production cases
- Team presentations & coaching

RECOMMENDED PARTICIPANTS

- Production Supervisors & Line Leaders
- IE / Process / Manufacturing Engineers
- Production & Operations Managers
- Lean / Kaizen / Continuous Improvement Teams
- Factory management staff involved in productivity improvement projects

TRAINING DURATION: 5 DAYS

The program content and implementation approach can be customized to align with the client's operational needs, industry context, and organizational objectives.

OBJECTIVE

- ✓ Understand Lean & Work Engineering fundamentals
- ✓ Identify waste and productivity losses
- ✓ Apply IE & Lean tools for process improvement
- ✓ Improve methods using ECRS and motion study
- ✓ Analyze bottlenecks and balance production lines
- ✓ Design efficient layouts and workflows
- ✓ Implement Kaizen activities effectively
- ✓ Measure productivity improvement results

PRODUCTIVITY IMPROVEMENT

No.	Content	Activity	Objective
1	Program Opening & Training Orientation	Opening Speech & Discussion	Align participants on productivity improvement objectives
2	Overview of Lean Manufacturing & Work Engineering	Interactive Lecture	Understand the role of IE in manufacturing
3	PQCDSM in Production Management	Group Discussion	Understand key operational performance indicators
4	Introduction to MUDA – MURA – MURI	Simulation Game	Develop waste identification mindset
5	8 Wastes in Manufacturing	Group Workshop	Understand causes and impacts of waste
6	GEMBA & Ohno Circle Observation	Practical Observation	Improve shopfloor observation skills
7	Introduction to Work Study: Method Study & Work Measurement	Examples and Practical Demonstrations.	Understand work study fundamentals
8	Job Analysis Practice on Production Line	Group Practice: observe a sample operation, break down work elements, and identify inefficiencies in motions and workflow.	Identify inefficient work methods
9	Day 1 Review & Q&A	Review & Discussion	Reinforce key learning points

PRODUCTIVITY IMPROVEMENT

No.	Content	Activity	Objective
1	Review & Warm-up Activity	Interactive Game	Reconnect with previous learning
2	Work Analysis Process in Industrial Engineering	Lecture	Understand the productivity improvement process
3	Common IE Improvement Tools	Lecture & Discussion	Learn fundamental IE tools
4	Process Mapping & Flow Process Chart	Group Practice	Analyze process flow effectively
5	ECRS Technique for Method Improvement	Practical Workshop	Eliminate non-value-added activities
6	Motion Economy & Ergonomics	Video Case Study	Optimize motion and reduce fatigue
7	Spaghetti Diagram & Travel Chart	Shopfloor Practice	Reduce movement and transportation waste
8	Root Cause Analysis for Productivity Problems	Group Practice	Identify root causes systematically
9	Mini Improvement Project Presentation	Team Presentation	Develop analysis and presentation skills

PRODUCTIVITY IMPROVEMENT

No.	Content	Activity	Objective
1	Warm-up & Daily Review	Game & Q&A	Reinforce learning continuity
2	Overview of Line Balancing	Explain line balancing principles and productivity calculation methods	Understand line balancing principles
3	Takt Time, Cycle Time & Lead Time	Calculation Practice	Understand relationships among production metrics
4	Bottleneck Process Identification	Simulation & Workshop	Identify process constraints
5	Yamazumi Chart & Capacity Analysis	Group Practice: Build Yamazumi charts	Evaluate workload distribution
6	Manpower Optimization	Case Study: Calculate machine and manpower capacity using actual production data.	Optimize workforce allocation
7	Multi-process Handling & Combination Work	Practice combining operations and improving operator utilization efficiency	Improve operational efficiency
8	Production Line Balancing Design	Teams redesign a production line to improve flow, reduce waiting, and increase output	Improve line productivity
9	Improvement Proposal Presentation	Presentation Session	Strengthen problem-solving capability

PRODUCTIVITY IMPROVEMENT

No.	Content	Activity	Objective
1	Review & Warm-up	Interactive Activity	Stimulate improvement mindset
2	Common Manufacturing Layout Types	Compare process layout, product layout, cellular layout, and hybrid systems using factory examples	Understand strengths and weaknesses of layouts
3	Lean Cell Layout Design	Teams redesign production cells to improve one-piece flow and reduce transportation waste	Design optimized production flow
4	Material Flow & Visual Management	Discussion & Case Study	Improve material movement efficiency
5	Standard Work & Work Instruction	Practical Exercise	Standardize work methods
6	Kaizen Mindset & Kaizen Methodology	Introduces continuous improvement principles and Kaizen implementation approaches.	Build continuous improvement culture
7	Kaizen Event Simulation	Simulation Activity	Practice rapid improvement techniques
8	Improvement Result Evaluation	Measure before-and-after productivity, manpower, and waste reduction results	Measure improvement effectiveness
9	Real Case Sharing & Reflection	Group Sharing	Learn practical implementation experiences

PRODUCTIVITY IMPROVEMENT

No.	Content	Activity	Objective
1	Final Day Warm-up	Ice-breaking Activity	Build positive learning energy
2	Guidance for Productivity Improvement Project	Coaching Session	Integrate all learned methods
3	Actual Production Line Analysis	Teams analyze actual or simulated production lines using learned Lean & IE tools	Apply tools in real production environment
4	Development of Overall Improvement Solutions	Participants build integrated solutions for productivity, quality, manpower, and workflow improvement	Strengthen system thinking capability
5	Productivity Improvement Benefit Calculation	Calculate productivity gain, manpower reduction, cost saving, and operational impact	Evaluate cost saving and productivity gain
6	Improvement Report Preparation	Team Coaching	Finalize improvement proposal
7	Team Improvement Project Presentation	Final Presentation	Enhance presentation and defense skills
8	Program Review & Feedback	Participants summarize key takeaways and action plans for workplace implementation	Consolidate key learning outcomes
9	Certificate Awarding & Recognition Ceremony	Ceremony	Recognize participants' achievements
